PROFESSIONAL SUMMARY

Full Stack and Ecommerce Developer with 4 years of experience (3 years in India, 1 year in the UAE) building enterprise Magento 2 platforms, Laravel and Next.js applications, CRM and lead generation systems, and AI-powered business automation. In the UAE, independently delivered the company website, in-house inventory software, WhatsApp and Bayut call automation, and Noon and Bayut marketplace listings, while also hiring and interviewing candidates. Proven ability to take projects from requirements to deployment without a dedicated team. Based in Dubai and available to join immediately.

CORE SKILLS

Languages: PHP, JavaScript, HTML5, CSS3, SQL, C, C++

Backend & Frameworks: Laravel, Magento 2, Yii Framework, Next.js, REST APIs, MVC, OOP, Composer

Automation & AI: AI-powered workflow automation, WhatsApp automation, call automation, third-party API integration, lead generation systems

Ecommerce: Magento 2, WordPress, catalog, order and inventory management, payment gateways (Stripe, PayTabs, Tabby, Tamara), multi-store

Marketplaces: Noon listing, Bayut listing

Databases: MySQL, Oracle, database design and optimization

Tools: Git, Linux, Apache, Postman, Jira, Azure, cPanel, GoDaddy, MS Excel and Word

PROFESSIONAL EXPERIENCE

Full Stack Developer (Ecommerce & Automation)
Jan 2026 – Present

United Arab Agencies, Dubai, UAE

- **Website:** Independently designed, built, and deployed the company website using Next.js and Laravel, managing the full project solo.
- **Software development:** Developed an in-house Inventory Management System on the Yii Framework covering inventory, products, invoicing, stock returns, and transaction tracking.
- **AI automation:** Designed and built AI-powered automation solutions that reduce manual work across sales and operations.
- **Communication automation:** Built WhatsApp automation and Bayut call automation to streamline customer and lead handling.
- **Lead generation and CRM:** Created a lead generation platform with CRM to capture, track, and manage leads.
- **Marketplaces:** Handled Noon and Bayut product and property listings to widen online reach.
- **Ecommerce:** Built and maintain the iPure Herbs ecommerce platform, covering catalog, orders, payments, and customer experience.
- **Hiring and team:** Sourced, screened, and interviewed candidates; provided user training and ongoing technical support.

Software Engineer L2
Dec 2023 – Sep 2025

Zerone Consultancy, Infopark, India

- Developed and maintained enterprise Magento 2 platforms for international clients (Acer Australia, Foxtel, Caravel Qatar).
- Built custom Magento 2 modules for booking systems, product lifecycle management, and event scheduling.
- Integrated third-party REST APIs to automate business processes and improve efficiency.
- Performed Magento upgrades, bug fixing, and production support, improving site stability and multi-store performance.
- Contributed to PropTech architecture supporting 64+ real estate websites (Proxima, Australia and Indonesia).

Junior Software Engineer
Aug 2022 – Nov 2023

Accuron Technologies, Infopark, India

- Developed CRM applications for real estate and distribution businesses.

- Built backend modules for inventory tracking, product workflows, and data processing, including features for the Vango B2B distribution platform.
- Implemented CRUD systems and secure Role-Based Access Control (RBAC); supported testing, deployment, and client issue resolution.

Chegg Expert Tutor (Remote) **Nov 2020 – Apr 2022**

Chegg, India

- Tutored university students in algorithms, databases, and programming through structured, step-by-step problem solving.

KEY PROJECTS

- **iPure Herbs (ipureherbs.org):** Herbal supplements ecommerce on Laravel 12, Next.js 15, MySQL, Redis, and Meilisearch with a Filament PHP admin; integrated Stripe, PayTabs, Tabby, Tamara, Aramex, DHL, and Klaviyo.
- **United Arab Agencies Website and Inventory System:** Next.js and Laravel corporate website plus Yii-based inventory software, both built solo.
- **Baniyas Oasis Electronics (baniyasoasiselectronics.com):** WordPress ecommerce built solo in 6 days with Stripe, Noon, and Bayut listing integrations.
- **Acer Australia (acer.com/au-en):** Backend lead on a large Magento 2 platform: custom modules, API integration, performance optimization.
- **Proxima (proxima.com.au):** Real estate reservation platform across 64+ sub-websites, with mobile app API, chatbot and email automation, commission system, and sales reporting.
- **Caravel Qatar (caravel.qa):** Catalog management and storefront development on a large Magento platform.
